- Python | Django
- Strong Communication

EXPERIENCE

FULL-STACK SOFTWARE ENGINEER INTERN

OurDate | July 2023 - present

- Created a React frontend for the startup's early-stage product, ensuring a seamless authentication process through the use of contexts and hooks.
- Developed a Django REST Framework with user authentication using djoser and JWT.
- Engage in proactive collaboration with cross-functional teams, integrating sleek UI components and robust backend features.
- Integrated Slack API with webhooks for channel notifications, and utilized Rollbar for production error logging, leading to an 80% improvement in debugging efficiency guaranteeing seamless application performance.
- Remain at the forefront of industry innovations by consistently updating knowledge on emerging technologies, enhancing the development lifecycle.

FRONTEND DEVELOPER

Freelance | June 2021 - present

- Established a cohesive visual identity across websites, standardizing fonts, formatting, imagery, and layouts.
- Adhered to best practices and coding standards, delivering high-caliber and optimized code.
- Skillfully pinpointed, diagnosed, and rectified code anomalies.
- Demonstrated a steadfast commitment to staying abreast of emerging technologies and contemporary concepts.
